Rules & Regulations.

Participants will receive packets of information and a CD containing the presentations and economic worksheets.

Lunch:

Lunch will be provided

Afternoon Tour:

Participants will have the opportunity to see first

hand how a fish farm operates and the ability to ask questions of the owner about his operation

Future Farm

Future Farm is a sister company of Baldwin Dairy, a 100 year old dairy farm. It is a 27,000 square foot aquaponic and hydroponic system that came online in January 2010 and is currently producing all natural vegetables and Tilapia fish.

Woods & Waters Enterprises, Inc.

Woods & Waters had its start in 1995 when Randy decided to switch from traditional farming to one with a more recreational approach. He started by transforming the cropland by adding ponds. Today he has 25 ponds, offers consulting for pond as well as supplies, fish and equipment for people who want to better manage their property.

These are part of a series of workshops that are held around the state and will incorporate farms that specialize in pond culture, raceways, Recirculation Aquaculture Systems (RAS) and aquaponics.

For additional information contact Ron Johnson, Aquaculture Outreach Specialist at 715-779-3189
